Collaboration is working together to achieve a goal , It is a recursive process where two or more people or organizations work together to realize shared goals.

STONS Collaboration solutions powered by IBM Lotus help you improve your business results help you boost productivity and innovation
Our Second TO None Collaboration solutions contain the following parts :Exceptional web experience , social collaboration , Unified communication and Messaging

Second TO None web experience

The ability to anticipate customer needs, to simplify how those needs are met, and to connect with others when, where, and how they want to engage is what an exceptional web experience is about , STONS Collaboration solution based on IBM Lotus portal ensure that your next customer won't leave your website within 5 seconds

Second TO None social collaboration

STONS collaboration solutions based on IBM Connections Help employees, partners, clients, and others engage with one another anytime and anywhere, by integrating business-focused collaboration solutions, including blogs, wikis, bookmarking, communities, team spaces, content management tools, enterprise IM, online meetings, audio and video chat, email, calendaring, and other collaborative applications, delivered on premises or in the cloud

Second TO None Unified communication

STONS unified communication solutions based on IBM Sametime enable groups of users to work together in real time by sharing information and processes. Unified communications includes:

- Enterprise instant messaging applications, including text, audio, and video
- Online or web conference applications
- Real-time team collaborative applications

Second TO None Messaging

STONS messaging solutions based on IBM Domino enable you to :

- Work in context with integrated social tools without switching between separate tools.
- Collaborate from virtually any device or web client.
- Build social applications that integrate information with social networks.
- Choose from flexible deployment options through on-premises, cloud, and hybrid implementations.

Protect your infrastructure and sensitive business data with content filtering, virus protection, and encryption

STONS
second to none solutions

STONS proven methodology is built on the following stages:

Plan	Identify & understand your business and project requirements.
Design	Construct the architecture and design for your best fitted solution.
Develop	Construct the solution and start building your testing & deploying plans.
Test	Execute the testing plans.
Deploy	Deploy the solution into your production environment & train your users.
